

Hi,

I would like to see the sale of assets to Echostar blocked, to enable the continuation of Voom Digital satellite service. There seems to be a lack of competitive alternatives in the National DBS/Cable field and I personally believe Voom Satellite Service has the potential to provide not just another DBS/Cable competitor, but push the other providers to provide better and more High Definition television options on a national level.

In the name of competition, please do not allow the sale of assets to Echostar.

Thank You
Philip Fasullo
